

LOCATION	Portland, Maine
REP	Visible Light
SPECIFIER	BOLD Lighting
PRODUCTS	Deep Extrusion Thin Extrusion LHE5.3W LED Tapelight LRA5.4W LED Tapelight

CHALLENGE

A large hotel had many different lighting requirements in a wide variety of applications including its restaurant, bar, individual guest rooms, and gym areas. The specifier sought an extrusion with tapelight solution that was multipurpose, with multiple lumen output options and CRI options to choose from.

SOLUTION

Deep Extrusion with LHE5.3W Tapelight was chosen for general lighting in multiple rows across the ceiling and walls of the gym. LRA5.4W Tapelight in the Deep Extrusion created accents for the bar area and in individual guest rooms. Thin Extrusion with LRA5.4W Tapelight provided a slim accent lighting solution for the restaurant area.
