CHALLENGE

Contractors noticed that another manufacturer's lighting was inconsistent and failing, but deadlines were approaching. Replacement materials were needed quickly. The solution must be able to accommodate extensive curved coves and provide consistent light levels, while also arriving at the job site without delay. Fast specification, speedy delivery, and product dependability were essential.

SOLUTION

After visiting the job site in-person and working closely with the installers, our team responded quickly with LLI-N4.6W-68-SD6S-40K LED Neon. The product arrived at the job site within schedule and exceeded the performance and build quality of the previous manufacturer. Installation was straightforward, and the result was a stunning modern interior for the residents and visitors of Driftwood Tremont.
